FEATURED PROJECTS (more details at My Repositories)

Job Portal Laravel   *12/2024 - 2/2025*

- Developed a dynamic job portal using Laravel and Blade, featuring three authentication roles: Admin, Companies, and Candidates.
- Admin: Manages all content, user roles, and permissions dynamically using Spatie Laravel Permissions.
- Companies: Post job listings with images, track applicants, purchase pricing plans via Stripe, and manage job postings.
- Candidates: Upload CVs, apply for jobs, bookmark listings, search jobs by location/title, and view company profiles.
- Implemented SoftDeletes, role-based access control with Spatie, authentication features (profile updates, password reset via email), Job Queue for email processing, Sessions, and Middleware for authorization.

Learning Management System   *8/2024 - 10/2024*

- Developed a Learning Management System with role-based authentication for Admin, Instructor, and User roles.
- Implemented course management, Q&A, reviews, and order tracking for Admins and Instructors.
- Enabled course browsing, shopping cart, and Stripe payment integration for Users.
- Applied MVC architecture, OOP principles, and Dependency Injection using PHP, MySQL, and Stripe API.
